# MPS+

## Modular system for baropodometric analysis

**MPS+** it's the new generation of **Loran Engineering** resistive modular platform used to execute static and dynamic analysis of the foot. It can be used for postural analysis.

**MPS+** is from 1 to 16m lenght, suitable for the Gait analysis. The first module can be disconnected and used as **EPS+R** model.

Get power data visualisation and accurate analysis in **Biomech®** software.

sensor type	resistive
sensor number	4069 - 65536
n° modules	2 ÷ 32
pressure range	50 - 350kpa
frequency	50Hz - 100Hz
Pc connection	USB
sensor size	9x9mm
module dimensions	50x70x4mm
plate weight	6kg x module
power supply	12Vdc
